## Fusion Research to participate at 14-City tour event

### *Fusion to sponsor Control4 multi-city Dealer Tour*

**Danville, CA, 4/9/2010** - Fusion Research announced today that the company would be one of seven sponsors of Control4's upcoming multi-city Dealer Tour. Fusion will be demonstrating its latest award winning media servers being controlled by a Control4 system in each city throughout the summer.

"The format of the Dealer Tour Event is terrific in that it allows the attendees to view our product and ask questions throughout the day," mentions Ingo Schmoltdt, Vice President of Sales for Fusion, "Given the fact that the dealers can see us multiple times during the training, we can do a better job answering their questions and going over how our products work with Control4."

The training events will be held throughout the U.S. and will offer both technical training as well as education on sales and bidding projects. Dealers who attend will be able to get hands on experience with the functionality of a Fusion media server inside a Control4 environment, which includes the first certified two-way driver for any media server. The driver delivers meta data and cover art on Control4 touch panels and television interface. Fusion is one of the very first Certified Partners for any product in Control4.

#### **About Fusion Research**

Fusion Research is a leading manufacturer of media servers, allowing people to collect, manage, and display their media throughout their home, business or yacht. The company's patent pending interface has received numerous awards and industry recognition. Fusion is headquartered in California with engineering in New York and India.
