Fusion Servers Now Support 3D

Company debuts 3D server on the show floor at CEDIA

Danville, CA, 9/19/2011 - Fusion Research recently debuted their new movie servers which support 3D blu-ray content in their booth at CEDIA, wowing the attendees who stopped by the booth for a live demonstration.

We've been monitoring the 3D marketplace for some time and we weren't going to push to be an 'early adopter' of the technology", said Ingo Schmoltdt, Vice President of Sales for Fusion. "Seeing the number of requests for 3D support from our dealers and their clients grow, we've taken the time to develop and deliver one of the best 3D experiences in the market place."

3D supported units will begin to be rolled out with their flagship Genesis Movie Server beginning October 1st at no additional charge. All other units will offer 3D as a special order from that date. For pricing and availability questions, please contact Fusion at 925.217.1233 or visit their website: www.fusionrd.com.

About Fusion Research

Fusion Research is a leading manufacturer of media servers, allowing people to collect, manage, and display their media throughout their home, business or yacht. The company's patent pending interface has received numerous awards and industry recognition. Fusion now supports Blu-ray, DVDs, music, photos & streaming media. Fusion is an official partner with most control companies including being the first media server to have a fully Certified two-way driver with Control4. Fusion is headquartered in California with engineering in Maryland. For information visit www.fusionrd.com or call 925-217-1233.
