## Fusion Shown at Control4's Booth at ISE

### *Fusion demonstrates its two-way interface with Control4 at ISE in Amsterdam*

**Danville, CA - 1/17/11** - Fusion Research announced today that they would be displaying the latest two-way interface and the Studio Movie Server at ISE in Control4's booth in Amsterdam.

Ingo Schmoltdt, Fusion's Vice President of Sales made the announcement as Control4 invited Fusion to once again participate at the important European show, "...we continue to work with Control4 to demonstrate the partnership and our close relationship. Being the only "Certified" Media Server product for them puts us in a very enviable position."

The Studio Movie Server shown at ISE was fully integrated into Control4's eco system and displayed the server's meta-data and cover art onto Control4 panels and displays, forming a full two-way communication interface.

According to the company's VP of Sales, "...with the cost of NAS storage and hard drives dropping combined with this new server, dealers can now spec this exciting system in jobs that couldn't consider this type of technology last year."

Fusion Media Servers will be featured at Control4 events in the future including the EHX show in Orlando, Florida in March 2011.

All Fusion media products can now be setup only requiring a handheld remote, not needing a PC to configure or extensive networking knowledge.

#### **About Fusion Research**
