Fusion Moves to New Facility

Fusion relocates to larger custom-built headquarters allowing better grow and production.

Danville, CA - 12/05/08 - Fusion Research completed its move today into a new larger headquarters located in Danville, California.

Joseph Storm, Fusion’s CEO explains, “We loved our old building, which had a very homey environment in a great quiet commercial section of Danville, California. We knew that we wanted to stay in the East Bay, close to San Francisco and Silicon Valley, but we needed a larger facility as the company was growing.”

“We were very fortunate to find a great building that we have been able to completely remodel to our specifications for electronics assembly and testing. We still hand build all our products here in the United States and plan to do so in the foreseeable future.”

“Our new facility has a demonstration showroom so that we can provide training or demos for our customers or even their clients.” “If any dealer has a client traveling to the San Francisco Bay Area, that would like a demonstration of our products, please just call us for an appointment, we would be happy to have you visit.”
