Fusion announces new 2-way Crestron Interface

*Fusion partners with Infusebox to offer the
one of the best media server interfaces on the market.*

Danville, CA - 5/8/08 - Fusion Research announced today that a new Crestron 2-way interface is now available through its software partner Infusebox. The software, which is now featured on Fusion's website can be used for use on all Fusion Genesis and Cinema Server products.

According to Fusion's CEO, Joe Storm, "...we were looking to partner with a authorized Crestron CAIP firm, who would take the time to make something special. Media servers offer the end-user an exciting entertainment experience, and we wanted to make sure that this extended to the interface on the control system." "We believe that Infusebox did an incredible job in taking our product and creating a beautiful media rich two-way GUI that people will love."

Tom Milpacher, the CEO of Infusebox adds, "We had been looking for the right media server company to build a relationship with, and Fusion Research stood out from the rest. For the end-user to have the best experience possible, it takes a collaborative approach. Tom goes onto say, "...we are delighted to bring a Module Suite to market that provides a bridge between Crestron and Fusion Research, allowing the end-user to more easily interact with Fusion's innovative products"

About Fusion Research
