Fusion adds iHeartRadio Stations

Fusion music servers now have access to US iHeartRadio stations

Danville, CA 1/17/18 - Fusion Research has added US based iHeartRadio stations to their Summit Music Servers. This brings back many of the local radio stations that used to be available through the Tune-in service that Fusion also supports.

iHeartRadio will be available as an update on any Summit-based Fusion music server. To get the service, dealers will want to download the latest configuration utility, which will be available next week, directly from Fusion's website. iHeartRadio is added to Fusion's existing services which include: Spotify, Pandora, TuneIn and SiriusXM which is expected to be released soon.

"We are excited to have this service available for our client's customers who want to listen to US based radio stations", said Robert Lew, Audio Product Manager, Fusion Research, "this is just the first of several new services we will be adding in this first quarter of 2018."

Fusion music servers are available exclusively through the custom integration channel and start at \$499 MSRP for an audiophile grade single source unit. For more information about the iHeartRadio stations using Fusion music servers, visit www.fusionrd.com, call 925.217.1233 or email: info@fusionrd.com
