Fusion Introduces New Ovation Setup Wizard

New wizard greatly simplifies the setup process for any Ovation Music Server

Danville, CA, 4/8/2015 - Fusion Research, has just released a new setup utility for its line of music servers. The new utility features a step-by-step wizard as well as a new configuration assistant tool. The utility is available as an executable program that may be downloaded directly from the company's website, www.fusionrd.com. There is a short video touring the new wizard on the support page of the website.

"We wanted to create a setup utility that automates, as well as simplifies, the whole dealer installation", mentions Alex Fanti, Chief Technical Officer of Fusion Research. "Amongst its other features, it streamlines the iTunes and other remote music folder synchronization process."

Another key feature of the wizard is the integration guides for the various drivers that Fusion has created for home automation partners such as Control4, URC, RTI, Elan g!, Savant, Crestron, Niles & SpeakerCraft. These guides show dealers how to install the drivers step-by-step as well as allow them to click on links to automatically store needed information from the Ovation server for the driver setup.

The Ovation Setup Wizard can be used on any Ovation music server shipped before May 2014. Any older unit can be upgraded to allow for the wizards use. For more information or dealer pricing, visit www.fusionrd.com or call 925.217.1233
