Fusion Includes AirPlay® on all Ovation Products

AirPlay® adds even more versatility to the award winning line of audio products

Danville, CA, 6/19/14 - After first announcing the AirPlay® wireless music streaming capability on the wildly successful Ovation Signature, Fusion today announced that it is now shipping all its Ovation products with AirPlay®.

"When we released the Signature with AirPlay, it was very well received." said Vice President of Sales Ingo Schmoltdt, "By adding AirPlay to all our Ovation products it allows users the versatility of playing visiting guests music as well as the few streaming apps we don't natively support."

AirPlay® is not a field updatable feature on older Ovation units; however Fusion has been shipping AirPlay® on all its Ovation products since the beginning of May. Along with its many streaming apps natively supported on Ovations as well as iTunes integration and both high and low res music files from a client's collection, AirPlay® now completes the way people can share their music.

This feature does not affect any of the current home automation drivers for companies like RTI, Elan g!, Savant, Control4, Crestron, AMX and the soon to be released URC driver.

To get dealer pricing or inquire about a deeply discounted showroom demo unit, please call 925.217.1233 or email.
