

# DUET MUSIC SERVER (FR-DUET)

HIGH RESOLUTION MUSIC SERVER, PERFECT FOR ANY PROJECT

*The Duet has been designed to work in residential and commercial environments. Working with all the major automation systems, this server can easily be the affordable, audiophile choice for all home or hospitality integration projects.*

*Three sources (if you need more sources, add additional Duets), rack mountable, high quality sound with an impressive Burr-Brown DAC, full 24 bit music support, AirPlay, digital music file support, now also featuring multiple Pandora accounts and Spotify Family.*

**All for under \$1000 MSRP!**

Now featuring Spotify Family, multiple Pandora (Premium) accounts, Tune-in and iHeartRadio.

## COMMERCIALLY LICENSED MUSIC

The SoundMachine service offers commercially licensed music for use in any public space. This service includes custom messaging, management of multiple locations from one computer as well as millions of songs all licensed for use anywhere!

Also supports AirPlay for other services or music a client might want to access!

## Supports Multiple iTunes Accounts

The Summit OS used on this Duet, now supports the ability to manage multiple iTunes accounts to ensure that the entire family can have their music at the ready. In addition to synchronizing the music and play lists, the Duet now backs up the music to any USB-based hard drive that is attached to it. This means that the client's no longer need to keep their computers on to listen to their iTunes collection!

**Multiple iTunes Accounts**  
Synchronize & BackUp

## CONTROLLING THE OVATION:

The Duet music server is specifically designed for the custom integration channel, it can be used with FREE iOS and Android apps (Fusion Music) or it will work seamlessly with most of the major home automation companies, including two-way drivers for: **Crestron, Control4, RTI, ELAN, URC, Niles, SpeakerCraft and Compass Controls (Key Digital)**
