Fusion Ovation Products Now Control4 Certified

After a year of work, Fusion's music server is first to be fully certified by Control4

Danville, CA, 6/11/15 - Fusion Research, an inaugural Control4 Certified Partner, has announced that on May 27th they officially became the first third-party manufactured music servers to be certified by Control4.

"Fusion Research has been a longtime partner of Control4," said Noel Gouff, Control4 Senior Director of Business Development. "We are thrilled to have a new certified driver for the Ovation line of music servers to create a seamless user-experience for Control4 Smart Home customers."

Control4 Certified means that you can rest assured that these products will work with your Control4 system. Independent certification guarantees that products with the Control4 Certified mark have been tested and are compatible with a Control4 system.

The entire current line-up of Ovation products include 24/192 HD track support as well as 192/24-bit output, beginning at \$499 for a single source.
