## **Fusion Celebrating 10 Years of Movie Servers with a New Model**

*The new Premiere-4 is much more powerful, more affordable*

**Danville, CA 8/25/16** - Fusion Research is debuting its new Movie Server, the Premiere-4 on the 10th anniversary of the introduction of their very first movie server. It's a more powerful variant of its entry level model at an affordable price point.

*"This is a culmination of our hard work over the years,"* said Ingo Schmoltdt, Vice President of Sales, *"the Premiere-4 can support up to 5 discrete movies playing at the same time, is rack mountable and seamlessly integrates with most of the major home automation solutions."*

All Fusion movie servers run on the company's own proprietary 3<sup>rd</sup> generation Epic™ platform that was created and improved over the years. Designed from the ground up all Fusion movie servers rely on the company's own movie database and Blu-ray playback engine for stable and reliable performance. In addition to being purpose built all Fusion servers allow users to "Add Your Own Storage" feature that allows you to grow the client's collections easily and affordably.

Unlike some non-proprietary movie solutions like Plex or XBMC, Fusion makes an exact back up of the entire DVD or Blu-ray, the full disc structure is available and users can choose to begin their experience at the start of the movie or access the full disc with trailers, extra features, language choices, etc.

You can add up to 4 zone players to a system to make the Premiere-4 a five discrete source movie system for use throughout the home. The Premiere-4, like all of Fusion's Movie Servers can easily be incorporated into most major automation systems.

Sold only through custom integration professionals, complete movie solutions start at \$2999 retail and have healthy margin structure, made even better for Fusion's largest dealers with their Platinum Program, better margins offering free shipping in the US, and longer warranties. Dealers looking to purchase a specially priced showroom demo, should get in touch with Fusion at [info@fusionrd.com](mailto:info@fusionrd.com) or 925.217.1233.

### **About Fusion Research**

Fusion Research is a leading manufacturer of media servers, allowing people to collect, manage, and display their media throughout their home, business or yacht. The company's products have received numerous awards and industry recognition. Fusion supports Blu-ray, DVDs, music & streaming media.
